Subject: Corneal Topography*

Updated: December 9, 2008

Department(s): Utilization Management

Policy: Corneal topography is reimbursable under Plans administered by QualCare, Inc.

Objective: To provide proper and consistent reimbursement for a medically necessary service

Procedure:

- The presence of a corneal lesion whose correction is covered by the specific Plan must be documented. These include, but are not necessarily limited to
  - Keratoconus (371.60 – 317.62)
  - Post-traumatic corneal scarring (371.00)
  - Complications of corneal transplant (996.51)
  - Central corneal ulcer (370.00 – 370.07)
  - Postoperative astigmatism after cataract or glaucoma or lens implant surgery (996.51)
  - Corneal dystrophy (371.50 – 371.58)
  - Bullous keratopathy (371.23)
  - Preoperative assessment for phototherapeutic keratectomy

- The correct CPT codes for corneal topography are 92135 and 92025.
Corneal topography is not covered when performed in connection with non-covered corneal surgery such as LASIK or other refractive procedures, nor is it covered as part of the pre-operative assessment of patients with cataracts and normal corneas.
